Coal Oil near Brighton

The fifth of November marks the anni-eratory of two prominent events in English istory—the discovery and prevention of the anpowder treason, and the inauguration of its revolution of 1688 by the landing of fillam the III. in Torbay. "To F. McArusary, Ex lisary Farrow."

After the above letter had been read,
Hon. Jospo Swarwoon said the letter
had taken him by surprise, as be had himself informed the Archdescon that this
adjourned meeting was to be held for the
very purpose of expressing the opinion of
the congregation as to whether he (the
Archdescon) would be acceptable to the
congregation. He would therefore move a
resolution prepared previous to his knowledge of the letter just read.

"Moved by Hon. Guo, SRERWOOD, sec-

shup for the appointment."

The yeas and anys were demanded, when there appeared for the motion 88-against, 11,21 members reducing to reduce the control of the motion 80-against the same than the resolution, arguing that as the Bishop had already made the appointment, this and similar motions would be of little avail.

That Crossing.

Not a little surprise has been expressed by many of the merchants on Front Street at the action taken by one of the representatives of Column Ward, at the meeting of the Town Council on Monday night, in moving that the new crossing; on Front Street be moved to opposite the Huffman House. Correspondents in both the daily papers have capressed their pleasure at the change being made, and given usansseroile arguments in favor of it; and yet in the face of this very decided expression of opinion through the press and on the attents, Mr. Vaudusen, with characteristic modesty (i) pays no attention to it, but to show how the because for the well-known and to gave a present the district Mr. Vaudusen, with other characteristic modesty (i) pays no attention to it, but to show how this to examine the removed to where the old one was.

If Mr. Vanduses will derote his attention to the crossings in his own Warth be will then be ministen and obliging those who live in this case.

BELLEVILLE, TUESDAY, NOV. 14.

THE MARKET.—A very light business has been done on the market to-day, owing to the unfavorable weather. Receipts of grain were limited to a few loads, and no change whatever was made in prices.

THE WEATHER.—The day looked like old-deshloned November weather. During the night the wind had recred to the east-ward, the temperature had moderated and rain was falling this morning. Decidently the weather to-day looked as if the prophecies of old residents regarding open weather were in course of fulfilment.

A Fixed System.

The whole secret of the successful farmer often lies in his having fixed a plan of operations. Multitudes have no plan but to meet their immediate necessities and make more but the mention. If wood brings high prices, they will arradually give up dairying and work methods. If wood brings high prices, they will arradually give up dairying and work will arradually give up dairying and work will arradually give up dairying for a time does not pay, they sell their Socks at a great searline. If hope are sixty cents a pound, they favest in hoppings of the sell of the proposes and kine for drying, and expect soldier wealth. If, when their yards come into full bearings, the prices fall off one-half or more, they are disgusted and ready to plough up their yards, concluding the business will not pay. There are men who are always taking up a good thing a little too late to make money by it. This work is the sell of the sell of the sell of the proposed the sell of the se found profitable. Dairying in a year of short grass-might not pay very well.

If you want people to read them, have them 'short and sweet.'

Judicious advertising always pays.

Large type is not necessary to an advertisement. Blind folks don't read newspapers.
